Alaska Energy Cost Reduction Program
Progress Report

Grantee: Alaska Power Company (a/k/a Alaska Power and Telephone Company)

Project Name: APC Automated Controls Project

Grant # 2195136

Period of Report: July 1 to July 31, 2004

Project activities completed: A separate 5kV switchgear enclosure has been installed and connected to one of the power plant engines. This temporary installation was necessary to allow the new equipment to be cut over to the town system without impacting any of the customers. The final transfer to the new equipment should to be completed over the next two months. Materials for the final cutover are being received and stored.

Options for the Coffman Cove and Thorne Bay will be discussed after completion of the Hydaburg equipment.

Project existing or potential problems: No problems exist to date. All material is within budgeted amounts.

Activities targeted for Next Reporting Period, Third Quarter 2004: It is anticipated that the final cutover to the new equipment will be completed during the next quarter.
