Lenny Welch, Plant Manager
Bethel Utilities Corporation
PO Box 2148
Bethel, AK 99559

Dear Mr. Welch:

The City of Bethel received a grant from the Denali Commission to purchase a commercial baler and to pay for 3 phase electrical connection to the Recycling Center. A System Ten-Sixty commercial baler that uses 3 phase power was ordered last week from Recycle Systems in Bellevue, Washington. Please consider this fax transmission and respective purchase order # 351156, the City's request for Bethel Utilities Corporation to connect 3 phase power to the Recycling Center.

We would like to have the 3 phase power hooked up by August 7, 2006, if possible. That will allow us to use the baler when it arrives on the barge during the first week in August. Call me at 543-1386 or send me an email at (jsargent@cityofbethel.net), if you have any questions about this order. Thank you.

Sincerely,

John Sargent
Grant Development Manager
